Frontend focused Full Stack Engineer with 6+ years of experience building scalable, high traffic applications at Amazon, Ford, and enterprise platforms. Specialized in React and TypeScript, with strong focus on system architecture and performance optimization for systems serving millions of users.

TECHNICAL SKILLS

Frontend: **React, TypeScript, JavaScript (ES6+), Angular, HTML5, CSS3, Tailwind, Material UI, Bootstrap**

Backend: **Node.js, Express.js, REST APIs, GraphQL, MongoDB, MySQL**

Cloud & Tools: **AWS, GCP, Git, Webpack, Grafana**

Testing: **Cypress, Jest, Selenium, Cucumber**

Artificial Intelligence (AI): **LangChain.js, OpenAI API, LLM integration, RAG pipelines, prompt engineering**

WORK EXPERIENCE

Arvi | Full Stack Engineer | Remote | May 2024 – Present

- Led frontend architecture and delivered key product features for Whampy, a platform built on Meta's WhatsApp Business API, using React and JavaScript.
- Designed system architecture for HR platform supporting 4,000+ employees, automating workflows and reducing 1,000+ hours of manual operations annually using Node.js and React.
- Mentored junior engineers and established best practices, improving code quality and delivery speed.

Ford Motor Company | Software Engineer | Seattle, WA, USA | Dec 2022 – Jul 2023

- Built features for the Vehicle Data Control Center, a centralized analytics platform for 500+ vehicle models using Angular, TypeScript, Java and GCP.
- Integrated Grafana dashboards, removing a key organizational blocker and enabling adoption across 5+ teams.
- Developed automated test suites with Cucumber and Selenium, improving QA efficiency by 30%.

Amazon Web Services | Frontend Engineer | Seattle, WA, USA | Apr 2021 – Oct 2022

- Led development of the Lifecycle Configuration feature for SageMaker Studio, used by 1.2M+ global users.
- Built scalable frontend components using React and GraphQL, enabling automated environment setup and reducing manual configuration by 70%.
- Expanded Cypress test coverage, improving UI stability and significantly reducing production issues.
- Partnered cross-functionally with backend and UX teams to deliver high quality, accessible user experiences.

Pacific Northwest National Laboratory | Research Associate | Richland, WA, USA | Jan 2019 – Apr 2021

- Developed an Angular based data visualization platform, reducing scientific data entry by 70%.
- Built a cybersecurity assessment tool using React and TypeScript to help facilities proactively identify system risks.

EDUCATION

Northeastern University | Master of Science | Computer Science | Seattle, WA, USA | 2016 - 2018

Rajasthan Technical University | Bachelor of Technology | Information Technology | Jaipur, India | 2011 - 2015

PROJECTS

LLM powered Quiz Generator | LangChain.js, OpenAI, Node.js, React

- Built an LLM-powered quiz platform using RAG to generate context-aware questions from user input and documents.
- Developed a document ingestion pipeline with text extraction and OCR fallback to support scanned and native PDF.
- Implemented semantic search with embeddings and chunking strategies to improve accuracy and reduce latency.
